Advice on compliance

How to satisfy the legislative requirements and special conditions

Three regions

Service provision across all three Belgian regions, Flanders, Brussels and Wallonia.

Did you know? If your business still holds an ARAB operating licence granted before the coming into force of the Vlarem legislation on 1 September 1991, your licence will expire with force of law on 1 September 2011. You can however convert your old licence to a Vlarem-compliant environmental licence

Environmental permits

An environmental permit is a legal requirement for the operation of your business. Acquiring the environmental licence is a first step, you then need to make sure you comply with the licence conditions. We provide personalised expert advice to clients throughout the three Belgian Regions. We will discuss your case with the competent government agencies and help you to achieve compliance with their requirements.
